

Inglés · 1.º medio

Conceptos explicados, ejemplos resueltos y práctica para escribir en la hoja.

1.º medio / Inglés

4 temas · alternativas + desarrollo + solucionario

Cómo usar esta guía

Lee la explicación y resuelve el ejemplo sin mirar. Luego contesta la alternativa y desarrolla la pregunta en el espacio disponible. Revisa las soluciones al final, corrige tu razonamiento y vuelve a intentar los ítems que fallaste.

Alineación y origen de los ejercicios

Los temas se seleccionaron a partir de las Bases y Programas del Currículum Nacional (Mineduc) para este curso. Las preguntas son originales, redactadas para Chile con el formato breve de selección múltiple y respuesta estructurada observado en los archivos de Cambridge IGCSE May/June 2026 (0511/21, 0500/12) aportados por el usuario. No son transcripciones de esas preguntas ni forman parte de una evaluación oficial.

Los textos y guiones breves se incluyen aquí. Para la práctica auditiva, otra persona debe leer el guion dos veces sin que el estudiante lo vea. La evaluación oral requiere interlocutor.

1. Reading: evidence and inference

Concepto. A writer can imply an attitude without stating it directly. Separate the literal detail from an inference supported by that detail. Identify purpose and audience through language, layout and examples; avoid adding facts the text never supplies.

Ejemplo resuelto. “After three failed trials, Camila smiled when the sensor finally worked.” We can infer satisfaction, supported by “smiled”.

1.1 What is directly stated? [1]

A Camila is a teacher

B The sensor worked

C The experiment was dangerous

D The sensor was expensive

1.2 Explain an inference about Camila's reaction and quote the precise detail that supports it. [2]

2. Listening: viewpoints

Concepto. Predict viewpoints before listening. Track who agrees, disagrees or changes their mind; “although” and “however” signal a shift. Distinguish an example from the speaker’s main position. A partner can read the script twice, then hide it while you answer.

Ejemplo resuelto. For example, “We planned Tuesday, but now it is Wednesday” signals that Wednesday is the final plan. Listen for the change without reading the teacher script.

2.1 Which setting does the speaker prefer for new experiments? [1]

A Online

B Laboratory

C At home alone

D No preference

2.2 Summarise one advantage and one limitation of online lessons according to this speaker. [2]

3. Writing: opinion paragraph

Concepto. Lead with a claim, develop two distinct reasons and illustrate one with a specific example. Link ideas with “because”, “for example” and “however”. Address a possible objection fairly and finish with a conclusion that follows the evidence.

Ejemplo resuelto. “School gardens support science learning because students can measure plant growth. For example, they can compare light conditions.”

3.1 Which word introduces contrast? [1]

A Because

B However

C For example

D Therefore always

3.2 Write 90–110 words: Should schools give students more outdoor learning? Give two reasons and one counterpoint. [6]

4. Speaking: mini presentation

Concepto. A short talk works best with a clear opening, two signposted points and a conclusion. Give precise examples, speak at a steady pace and listen to a follow-up question before answering it. Notes are prompts, not a text to read word for word.

Ejemplo resuelto. "First, the campaign saves paper. Second, students can measure weekly use. In conclusion, the plan is practical."

4.1 Which word signals the final idea? [1]

A First

B Second

C In conclusion

D Weekly

4.2 Prepare a one-minute talk on reducing waste at school: opening, two actions, evidence to measure success, closing. [3]

Solucionario y criterios

La respuesta de desarrollo muestra una solución modelo; se aceptan formulaciones científicas o matemáticas equivalentes que justifiquen el procedimiento. En Inglés, la producción abierta admite respuestas diversas que cumplan los criterios.

1. Reading: evidence and inference

1.1 [1 punto]: B. B The sensor worked

1.2 [2 puntos]: She was pleased or relieved; “smiled” after “three failed trials” supports it.

2. Listening: viewpoints

2.1 [1 punto]: B. B Laboratory

2.2 [2 puntos]: Useful for revision; less suitable than laboratory for learning new experiments.

3. Writing: opinion paragraph

3.1 [1 punto]: B. B However

3.2 [6 puntos] (contenido 3; organización y lengua 3): Accept a clear position, two developed reasons, one fair counterpoint, coherent linking and 90–110 words.

4. Speaking: mini presentation

4.1 [1 punto]: C. C In conclusion

4.2 [3 puntos]: Accept two feasible actions, a measure such as kg/week or number of bins, and audible logical transitions.

Guion de audio para quien lee

Mantener esta sección cubierta durante el ejercicio. Leer dos veces a ritmo natural y pausar antes de que el estudiante responda.

I like online lessons for revision; however, I learn new experiments better in the laboratory.

Fuentes para planificación docente

- Ministerio de Educación de Chile: <https://www.curriculumnacional.cl/curriculum/7o-basico-2o-medio/ingles/1-medio> (curso y asignatura; consultar OA y Programa de estudio).
- Material de consulta de formato: Cambridge IGCSE May/June 2026 Question Papers y Mark Schemes aportados por el usuario (0511/21, 0500/12). Los ítems de esta guía son originales.

Cobertura: guía de estudio de los ejes centrales del nivel; el programa oficial detalla otros objetivos, actitudes y habilidades que requieren actividades de aula y evaluación adicionales.
