

2.6 Rational functions (HL)

Functions · IB Diploma · Concept guide and original exam-style practice

Understand the concept

A rational function of the form $f(x) = (ax+b)/(cx+d)$ ($c \neq 0$, $ad-bc \neq 0$) is a transformation of $y=1/x$. It has a vertical asymptote at $x=-d/c$ (where the denominator is zero) and a horizontal asymptote at $y=a/c$ (the ratio of leading coefficients, from polynomial division as $x \rightarrow \pm\infty$). The graph consists of two branches approaching these asymptotes.

Worked example: follow the reasoning

Find the asymptotes of $f(x) = (2x+1)/(x-3)$, and the intercepts.
Vertical asymptote: $x-3=0$, so $x=3$.
Horizontal asymptote: $y=2/1=2$ (ratio of leading coefficients).
Y-intercept: $f(0)=1/(-3)=-1/3$.
X-intercept: $2x+1=0$, $x=-1/2$.

Quick check · multiple choice

The function $f(x) = (3x-2)/(x+4)$ has vertical and horizontal asymptotes:

- A $x=4$, $y=3$
- B $x=-4$, $y=3$
- C $x=-4$, $y=-2$
- D $x=4$, $y=-2$

Write your choice: _____

Structured practice

Answer in the space provided. Show working and units where relevant.

- 1 Consider $f(x) = (5-2x)/(x+1)$, $x \neq -1$. [7]
- (a) Write $f(x)$ in the form $A + B/(x+1)$ by division, and hence state the equations of both asymptotes.
 - (b) Find the coordinates of the point(s) where $f(x)$ crosses the coordinate axes.
 - (c) Sketch the key features described, and state the range of f .

Final answer: _____

Answers and explanation

Question 1 [7]

- (a) $(5-2x)/(x+1) = (-2(x+1)+7)/(x+1) = -2 + 7/(x+1)$. So asymptotes: vertical $x=-1$, horizontal $y=-2$.
- (b) Y-intercept: $f(0)=5/1=5$, point $(0,5)$. X-intercept: $5-2x=0$, $x=2.5$, point $(2.5,0)$.
- (c) Since $f(x)=-2+7/(x+1)$ and $7/(x+1)$ can take any nonzero real value, range is $f(x) \neq -2$ (all reals except -2).

Quick check answer

B. Vertical asymptote where denominator=0: $x=-4$. Horizontal asymptote: ratio of leading coefficients = $3/1 = 3$.

Self-assessment

Compare each credited step with your own answer. Fix the first reasoning or content error, then retry the practice question without looking at the solution.
