

3.1 Volume and surface area of 3D solids

Geometry and trigonometry · IB Diploma · Concept guide and original exam-style practice

Understand the concept

Standard formulas: cuboid/prism $V = \text{base area} \times \text{height}$; cylinder $V = \pi r^2 h$, curved surface area $= 2\pi r h$; cone $V = \frac{1}{3}\pi r^2 h$, curved surface area $= \pi r l$ (l = slant height); sphere $V = \frac{4}{3}\pi r^3$, surface area $= 4\pi r^2$; pyramid $V = \frac{1}{3} \times \text{base area} \times \text{height}$. Total surface area sums all faces including base(s).

Worked example: follow the reasoning

Find the volume and total surface area of a cone with radius 5 cm and height 12 cm.

Slant height $l = \sqrt{5^2 + 12^2} = \sqrt{169} = 13$ cm.

Volume $= \frac{1}{3}\pi(5^2)(12) = \frac{1}{3}\pi(300) = 100\pi \approx 314.2$ cm³.

Total surface area $= \pi r l + \pi r^2 = \pi(5)(13) + \pi(25) = 65\pi + 25\pi = 90\pi \approx 282.7$ cm².

Quick check · multiple choice

A sphere has radius 3 cm. What is its volume?

A 12π cm³

B 36π cm³

C 27π cm³

D 9π cm³

Write your choice: _____

Structured practice

Answer in the space provided. Show working and units where relevant.

- 1 A solid consists of a cylinder of radius 4 cm and height 10 cm, topped with a hemisphere of the same radius. [6]
- (a) Find the total volume of the solid, in terms of π .
- (b) Find the total surface area of the solid (curved cylinder surface + hemisphere curved surface + one circular base), in terms of π .

Final answer: _____

Answers and explanation

Question 1 [6]

(a) Cylinder volume = $\pi(4^2)(10) = 160\pi$. Hemisphere volume = $(1/2)(4/3)\pi(4^3) = (2/3)\pi(64) = 128\pi/3$. Total = $160\pi + 128\pi/3 = (480\pi + 128\pi)/3 = 608\pi/3 \text{ cm}^3$.

(b) Cylinder curved surface = $2\pi(4)(10) = 80\pi$. Hemisphere curved surface = $2\pi(4^2) = 32\pi$. Base circle = $\pi(4^2) = 16\pi$. Total = $80\pi + 32\pi + 16\pi = 128\pi \text{ cm}^2$.

Quick check answer

B. $V = (4/3)\pi(3^3) = (4/3)\pi(27) = 36\pi \text{ cm}^3$.

Self-assessment

Compare each credited step with your own answer. Fix the first reasoning or content error, then retry the practice question without looking at the solution.
