

What is the central idea in Directed writing and text transformation?

9093-01-C1

QUESTION

Which mechanism, condition or distinction matters in Directed writing and text transformation?

9093-01-C2

QUESTION

Original stimulus: “At dawn we hauled twenty bags from the riverbank; by noon families were using the path again.” Write the opening 120–160 words of a public information update for residents. Explain two audience choices.

9093-01-P

QUESTION

What is the central idea in Comparative commentary?

9093-02-C1

QUESTION

Which mechanism, condition or distinction matters in Comparative commentary?

9093-02-C2

QUESTION

Text A: “Please leave the hall immediately by the east exit.”
Text B: “The hall emptied, but the echo of footsteps stayed with me.” Compare how their language creates different responses.

9093-02-P

QUESTION

What is the central idea in Imaginative writing?

9093-03-C1

QUESTION

Which mechanism, condition or distinction matters in Imaginative writing?

9093-03-C2

QUESTION

Write 200–250 words beginning “The lights went out one floor at a time.” Create a distinct atmosphere and explain two structural choices.

9093-03-P

QUESTION

What is the central idea in Discursive and persuasive writing?

9093-04-C1

QUESTION

Which mechanism, condition or distinction matters in Discursive and persuasive writing?

9093-04-C2

QUESTION

Write a 180–220 word speech paragraph to student representatives arguing for or against a later school start. Include one concession and one concrete proposal.

9093-04-P

QUESTION

A strong response supplies precise twenty-bag evidence, accessible public tone, purpose in the first sentence and realistic next step. It avoids inventing unsupported statistics. Commentary identifies wording and order, e.g. action first to reassure residents, then an invitation to maintain the path.

9093-01-P

ANSWER

A directed response succeeds when it selects details, reorganises them for the new reader and avoids copying a source's phrasing mechanically.

9093-01-C2

ANSWER

Identify genre, audience, purpose and register before transforming a source. Retain relevant factual content while changing voice, organisation and tone to meet a new brief.

9093-01-C1

ANSWER

A strong comparison links A's polite imperative, location detail and immediate time frame to safety; B's personification of echo, first-person viewpoint and retrospective past tense to memory. Develop an argument about audience, not a catalogue of labels.

9093-02-P

ANSWER

Analyse how lexis, syntax, imagery, cohesion and structure position the reader. Embed short evidence, explain effects cautiously and connect differences to genre and context.

9093-02-C2

ANSWER

Compare how two texts construct meanings for different audiences and purposes, not just list devices separately.

9093-02-C1

ANSWER

Credit coherent perspective, sustained atmosphere, crafted sensory imagery and purposeful ending. An effective commentary explains why gradual darkening is repeated for pacing and why the final image changes the reader's interpretation, with quoted phrases from the student's own draft.

9093-03-P

ANSWER

Sentence length and focalisation control pace. Draft one governing idea and revise away redundant modifiers.

9093-03-C2

ANSWER

Narrative and descriptive writing require deliberate perspective, setting and structural movement. Description can develop a mood through selected senses without becoming a list; narrative needs a change or tension.

9093-03-C1

ANSWER

A strong paragraph identifies student audience, gives an arguable claim, anticipates the transport objection, proposes a timed trial and avoids fabricated research. Reward sustained voice, coherent transitions and a persuasive close; language is assessed in its rhetorical context.

9093-04-P

ANSWER

Distinguish evidence from assertion; use concession before rebuttal rather than a straw opponent. A clear introduction frames the issue, and a conclusion follows the argument.

9093-04-C2

ANSWER

Discursive writing weighs viewpoints and qualifies claims; persuasive writing aims to move a specific audience through selection, sequencing and rhetorical appeals.

4.2 Language and the self

What is the central idea in Language and the self?

9093-08-C1

QUESTION

FagusED · A-Level 9093
4.2 Language and the self

Which mechanism, condition or distinction matters in Language and the self?

9093-08-C2

QUESTION

FagusED · A-Level 9093
4.2 Language and the self

A student writes “Hey, got the notes?” to a friend and “Dear Ms Lee, could you share the notes?” to a teacher. Analyse how language marks relationship and a limit of the inference.

9093-08-P

QUESTION

FagusED · A-Level 9093
3.1 Language change

A strong answer identifies noun-to-verb development and metaphor/semantic extension, supports claims with both examples and acknowledges two sentences cannot establish frequency, period or general usage. It separates observation from speculation.

9093-05-P

ANSWER

FagusED · A-Level 9093
3.1 Language change

Analyse spelling, lexis, semantics and grammar using actual evidence; representativeness and dating of sources limit generalisations.

9093-05-C2

ANSWER

FagusED · A-Level 9093
3.1 Language change

Language changes through contact, technology, identity and shifting social attitudes. Trace a feature across data rather than assuming all change is decay or progress.

9093-05-C1

ANSWER

FagusED · A-Level 9093
3.2 Child language acquisition

A strong response explains plural overgeneralisation, child persistence, adult recast and limits of inference from a short exchange. Discusses evidence in linguistic terms, with cautious links to acquisition and interaction rather than diagnosing ability.

9093-06-P

ANSWER

FagusED · A-Level 9093
3.2 Child language acquisition

Caregiver response, interaction and context matter. Compare explanatory models cautiously rather than treating one theory as universal.

9093-06-C2

ANSWER

FagusED · A-Level 9093
3.2 Child language acquisition

Analyse child language through phonology, lexis, grammar and pragmatics using the exact transcript. Overgeneralisation can reveal productive rule learning; a single utterance is weak evidence for a stage.

9093-06-C1

ANSWER

FagusED · A-Level 9093
4.1 English in the world

A strong answer connects lexical borrowing to identity and glossing to wider accessibility; evaluates audience/genre; notes a single edited text cannot represent all speakers or varieties. Use observations before broad claims.

9093-07-P

ANSWER

FagusED · A-Level 9093
4.1 English in the world

Language policy, education, media and multilingualism affect use. Distinguish an evidence-based description from stereotype.

9093-07-C2

ANSWER

FagusED · A-Level 9093
4.1 English in the world

World Englishes vary in pronunciation, vocabulary and grammar through contact and local identity. Describe a variety in its own systematic context instead of ranking it against one national "standard".

9093-07-C1

ANSWER

FagusED · A-Level 9093
4.2 Language and the self

A strong answer contrasts greeting, elliptical syntax and politeness with formal address and modal request; links choices to audience and situation while noting that two messages do not prove a fixed personal identity.

9093-08-P

ANSWER

FagusED · A-Level 9093
4.2 Language and the self

Analyse pronouns, address, code choice, politeness and evaluative vocabulary. Ethical interpretation requires attention to context and avoiding assumptions about background.

9093-08-C2

ANSWER

FagusED · A-Level 9093
4.2 Language and the self

Language choices help construct identity, relationships and stance. A speaker may shift style between peer group, classroom and workplace without possessing a single "real" voice.

9093-08-C1

ANSWER
