

1.1 Directed writing and text transformation

What is the central idea in Directed writing and text transformation?

Identify genre, audience, purpose and register before transforming a source. Retain relevant factual content while changing voice, organisation and tone to meet a new brief.

9093-01-C1

QUESTION + ANSWER

1.1 Directed writing and text transformation

Which mechanism, condition or distinction matters in Directed writing and text transformation?

A directed response succeeds when it selects details, reorganises them for the new reader and avoids copying a source's phrasing mechanically.

9093-01-C2

QUESTION + ANSWER

1.1 Directed writing and text transformation

Original stimulus: "At dawn we hauled twenty bags from the riverbank; by noon families were using the path again." Write the opening 120–160 words of a public information update for residents. Explain two audience choices.

A strong response supplies precise twenty-bag evidence, accessible public tone, purpose in the first sentence and realistic next step. It avoids inventing unsupported statistics. Commentary identifies wording and order, e.g. action first to reassure residents, then an invitation to maintain the path.

QUESTION + ANSWER

1.2 Comparative commentary

What is the central idea in Comparative commentary?

Compare how two texts construct meanings for different audiences and purposes, not just list devices separately.

9093-02-C1

QUESTION + ANSWER

1.2 Comparative commentary

Which mechanism, condition or distinction matters in Comparative commentary?

Analyse how lexis, syntax, imagery, cohesion and structure position the reader. Embed short evidence, explain effects cautiously and connect differences to genre and context.

9093-02-C2

QUESTION + ANSWER

2.1 Imaginative writing

What is the central idea in Imaginative writing?

Narrative and descriptive writing require deliberate perspective, setting and structural movement. Description can develop a mood through selected senses without becoming a list; narrative needs a change or tension.

9093-03-C1

QUESTION + ANSWER

2.1 Imaginative writing

Which mechanism, condition or distinction matters in Imaginative writing?

Sentence length and focalisation control pace. Draft one governing idea and revise away redundant modifiers.

9093-03-C2

QUESTION + ANSWER

1.2 Comparative commentary

Text A: "Please leave the hall immediately by the east exit." Text B: "The hall emptied, but the echo of footsteps stayed with me." Compare how their language creates different responses.

A strong comparison links A's polite imperative, location detail and immediate time frame to safety; B's personification of echo, first-person viewpoint and retrospective past tense to memory. Develop an argument about audience, not a catalogue of labels.

9093-02-P

QUESTION + ANSWER

2.1 Imaginative writing

Write 200–250 words beginning "The lights went out one floor at a time." Create a distinct atmosphere and explain two structural choices.

Credit coherent perspective, sustained atmosphere, crafted sensory imagery and purposeful ending. An effective commentary explains why gradual darkening is repeated for pacing and why the final image changes the reader's interpretation, with quoted phrases from the student's own draft.

9093-03-P

QUESTION + ANSWER

2.2 Discursive and persuasive writing

Which mechanism, condition or distinction matters in Discursive and persuasive writing?

Distinguish evidence from assertion; use concession before rebuttal rather than a straw opponent. A clear introduction frames the issue, and a conclusion follows the argument.

9093-04-C2

QUESTION + ANSWER

2.2 Discursive and persuasive writing

What is the central idea in Discursive and persuasive writing?

Discursive writing weighs viewpoints and qualifies claims; persuasive writing aims to move a specific audience through selection, sequencing and rhetorical appeals.

9093-04-C1

QUESTION + ANSWER

2.2 Discursive and persuasive writing

Write a 180–220 word speech paragraph to student representatives arguing for or against a later school start. Include one concession and one concrete proposal.

A strong paragraph identifies student audience, gives an arguable claim, anticipates the transport objection, proposes a timed trial and avoids fabricated research. Reward sustained voice, coherent transitions and a persuasive close; language is assessed in its rhetorical context.

9093-04-P

QUESTION + ANSWER

3.2 Child language acquisition

Which mechanism, condition or distinction matters in Child language acquisition?

Caregiver response, interaction and context matter. Compare explanatory models cautiously rather than treating one theory as universal.

9093-06-C2

QUESTION + ANSWER

4.1 English in the world

Which mechanism, condition or distinction matters in English in the world?

Language policy, education, media and multilingualism affect use. Distinguish an evidence-based description from stereotype.

9093-07-C2

QUESTION + ANSWER

4.1 English in the world

Dataset: a local newspaper retains an untranslated food name, then glosses it in English. Analyse two reasons for this choice and one risk of treating this sample as typical of a whole country.

A strong answer connects lexical borrowing to identity and glossing to wider accessibility; evaluates audience/genre; notes a single edited text cannot represent all speakers or varieties. Use observations before broad claims.

9093-07-P

QUESTION + ANSWER

3.1 Language change

What is the central idea in Language change?

Language changes through contact, technology, identity and shifting social attitudes. Trace a feature across data rather than assuming all change is decay or progress.

9093-05-C1

QUESTION + ANSWER

3.1 Language change

Compare the meanings of “stream” in “a stream crossed the field” and “stream the lecture live”. Explain one mechanism of semantic change and one limit of this tiny dataset.

A strong answer identifies noun-to-verb development and metaphor/semantic extension, supports claims with both examples and acknowledges two sentences cannot establish frequency, period or general usage. It separates observation from speculation.

9093-05-P

QUESTION + ANSWER

4.1 English in the world

What is the central idea in English in the world?

World Englishes vary in pronunciation, vocabulary and grammar through contact and local identity. Describe a variety in its own systematic context instead of ranking it against one national “standard”.

9093-07-C1

QUESTION + ANSWER

4.2 Language and the self

What is the central idea in Language and the self?

Language choices help construct identity, relationships and stance. A speaker may shift style between peer group, classroom and workplace without possessing a single “real” voice.

9093-08-C1

QUESTION + ANSWER

3.1 Language change

Which mechanism, condition or distinction matters in Language change?

Analyse spelling, lexis, semantics and grammar using actual evidence; representativeness and dating of sources limit generalisations.

9093-05-C2

QUESTION + ANSWER

3.2 Child language acquisition

What is the central idea in Child language acquisition?

Analyse child language through phonology, lexis, grammar and pragmatics using the exact transcript. Overgeneralisation can reveal productive rule learning; a single utterance is weak evidence for a stage.

9093-06-C1

QUESTION + ANSWER

3.2 Child language acquisition

Transcript: Child, age 3: “Two mouses came.” Adult: “Two mice?” Child: “Yes, two mouses.” Analyse the child's morphology and the adult's response.

A strong response explains plural overgeneralisation, child persistence, adult recast and limits of inference from a short exchange. Discusses evidence in linguistic terms, with cautious links to acquisition and interaction rather than diagnosing ability.

9093-06-P

QUESTION + ANSWER

4.2 Language and the self

Which mechanism, condition or distinction matters in Language and the self?

Analyse pronouns, address, code choice, politeness and evaluative vocabulary. Ethical interpretation requires attention to context and avoiding assumptions about background.

9093-08-C2

QUESTION + ANSWER

A student writes “Hey, got the notes?” to a friend and “Dear Ms Lee, could you share the notes?” to a teacher. Analyse how language marks relationship and a limit of the inference.

A strong answer contrasts greeting, elliptical syntax and politeness with formal address and modal request; links choices to audience and situation while noting that two messages do not prove a fixed personal identity.
