

Multiple matching across texts

Component 1 · Exercise 2 · 9 marks | syllabus 2027-2029

Learning focus

Compare four related accounts, noticing paraphrase, implied meaning and one unique clue for each match.

Build a four-text map

Read the question first, then write a quick label for each text. Underline a phrase that uniquely supports a match. One letter may answer more than one question. A matching answer should come from the text, not your assumption about a project.

Worked example

A describes a printed map for residents without phones; a question about making information accessible without a device matches A.

Distinguish the main experience

Look past a repeated word. Both B and D changed location or schedule, but B found an unexpected advantage after a move indoors, whereas D moved a work session to suit weekend helpers. Follow why the change happened.

Worked example

“A problem led to more visitors” → B: rain moved the workshop near the market, where more people found it.

Reading text · about 600-650 words

Four young people describe a community project

A — Leila: Making a neighbourhood map

Our team began by asking older residents to tell us about places that mattered to them. Several mentioned a small courtyard behind the shops, which I had passed for years without noticing. I expected to spend most of my time drawing, but interviewing people was more useful. One resident

showed us a shortcut that was not on any online map. We checked that the route was open to the public before adding it. The hardest part was choosing what to leave out: the page could not fit every story. We made a printed version because some residents do not use a phone. Watching them point out familiar corners at the launch was my favourite moment.

B — Tomas: Repairing bicycles

I knew how to change a tyre when I joined the workshop, but I had never taught anyone else. A volunteer mechanic explained that the aim was to help visitors learn, not do every job for them. My first visitor was impatient when I asked her to try the tools herself; after ten minutes, she was fixing a loose brake cable. We always check work with the mechanic before a bicycle leaves. We wanted to hold the session outdoors, but rain forced us into a covered car park. Surprisingly, more people found us there because it is beside the market. We now open every second Saturday and borrow equipment from a local shop.

C — Priya: A food-sharing shelf

The café had unsold packaged food at the end of the day, while some families wanted a small supply for later. We arranged a shelf near the community centre entrance, with clear labels and collection times. Food safety mattered more than the number of items donated, so anything unsuitable for the shelf was refused. At first, the shelf was often empty before people finished work. We asked the café to put half its donation out later. That simple change helped more people use it. I enjoyed planning the labels, although listening to users and changing our timetable taught me more than the design work.

D — Omar: Planting a shared garden

The first meeting took place on a patch of ground where nothing seemed to grow. We tested the soil with help from a local gardener, then planted vegetables that could manage with little water. I thought the project would be finished once the beds were built. In fact, we needed a rota for watering, weeding and collecting tools. Some neighbours could only help at weekends, so we moved the regular work session from Wednesday. A school class visits to measure the plants, and several families take home herbs. I like seeing changes that happen slowly; we are already planning what to plant next season. The first harvest was smaller than we expected, but that did not worry the gardener: the group learned which parts of the ground need more shade. The children who visit the beds ask us about insects as often as they ask about vegetables, so next term we may add a small information board. On the day we built the raised beds, everyone wanted a photograph. Now I prefer the ordinary mornings when neighbours arrive with a watering can and stay to talk. A visitor recently offered to make a bench using unused wood; before agreeing, we checked that it would leave enough room for wheelchairs on the path. The garden belongs to people who use it in different ways, not just those who have time to do the planting. We try to explain this clearly at meetings, so newcomers understand that listening to different needs is as important as digging.

Read the four texts A–D. For Questions 1–9, choose the person whose account includes the information. Write A, B, C or D. Each letter may be used more than once.

1. I learned more by talking to people than by carrying out the task I first expected. [1]

2. A change caused by poor weather unexpectedly attracted more visitors. [1]

3. We delayed putting out some materials so that a wider group could use them. [1]

4. I discovered that the project required ongoing work after its physical construction. [1]

5. The public received a non-digital version of our work. [1]

6. An expert checks the finished work before a visitor leaves. [1]

7. We rejected some contributions to protect people's health. [1]

8. A regular meeting was moved to suit people with limited weekday time. [1]

9. We checked whether an unfamiliar route could legally be used by everyone. [1]

Answers and explanations

1. A [1]. Locate the unique detail in that account and eliminate similar projects.
2. B [1]. Locate the unique detail in that account and eliminate similar projects.
3. C [1]. Locate the unique detail in that account and eliminate similar projects.
4. D [1]. Locate the unique detail in that account and eliminate similar projects.
5. A [1]. Locate the unique detail in that account and eliminate similar projects.
6. B [1]. Locate the unique detail in that account and eliminate similar projects.
7. C [1]. Locate the unique detail in that account and eliminate similar projects.
8. D [1]. Locate the unique detail in that account and eliminate similar projects.
9. A [1]. Locate the unique detail in that account and eliminate similar projects.

Checking your work

Read the question again after finding the evidence. Do not add a second, conflicting answer. For multi-point questions, count distinct details.

Assessment structure: Cambridge IGCSE English as a Second Language (Count-in Speaking) 0511 syllabus for 2027–2029, <https://www.cambridgeinternational.org/Images/721343-2027-2029-syllabus.pdf>. Original passages, prompts and scripts by FagusED. June 2026 papers and mark schemes supplied by the user informed presentation. Independent practice material, not an official Cambridge paper.
