01 · Reading for precise information

Skim for the overall subject before hunting for details. Circle key words in the question, scan for a paraphrase in the text and reread the surrounding sentence. A date, reason and condition are different information types. The last question requires three distinct answers.

01 · Reading for precise information

Questions often place a tempting but wrong fact close to the right one. Check the timeframe and the person: the teacher visits Thursdays, while the library closes at six. Use one word or phrase for most answers.

03 · Selective note taking

Selective note taking from a roughly 400–500-word text; seven brief points, one mark each.

02 · Multiple matching across texts

Look past a repeated word. Both B and D changed location or schedule, but B found an unexpected advantage after a move indoors, whereas D moved a work session to suit weekend helpers. Follow why the change happened.

02 · Multiple matching across texts

Read the question first, then write a quick label for each text. Underline a phrase that uniquely supports a match. One letter may answer more than one question. A matching answer should come from the text, not your assumption about a project.

ESL-0007

RESPUESTA

FagusED · English Second Language
03 · Selective note taking

Use each answer line for a different point and avoid copying unrelated facts. If a challenge asks for two examples, road closure and funding costs count separately. The note must preserve the meaning and not reverse a condition.

ESL-0012

RESPUESTA

FagusED · English Second Language
03 · Selective note taking

Each heading defines a purpose. Match evidence to that purpose and write the shortest clear phrase; full sentences are unnecessary. A number is useful only if it answers the heading. Distinguish “what happens” from “why it matters”.

ESL-0011

RESPUESTA

FagusED · English Second Language
03 · Selective note taking

A short clear phrase is sufficient; it must fit the heading and be distinct from the other notes.

04 · Views, attitude and inference

Watch markers such as at first, then, however and later. A writer may start disappointed and end convinced. In a multiple-choice item, an option can mention a true detail but misstate the overall attitude.

ESL-0033

PREGUNTA

Grammar 10, vocabulary 10, development 10 and pronunciation 10.

ESL-0030

RESPUESTA

Interview, short talk and discussion; the preceding introduction and warm-up are not assessed.

ESL-0029

RESPUESTA

Distinguish “I thought it would be difficult” from “it was difficult”; a speaker can revise an opinion. For matching, identify each speaker’s defining reason before choosing a statement. The official Component 2 has 40 one-mark questions over five exercises; this 20-item subset samples all five types.

ESL-0028

RESPUESTA

In the test, the candidate sees a card and has up to one minute to prepare; written notes are not allowed. Use a mental structure: introduce the topic, describe an experience, explain a benefit and a difficulty, then conclude. Speak for a sustained period and develop ideas naturally.

ESL-0033

RESPUESTA

Move beyond a single fact: give a reason, example or consequence. A brief pause to think is natural. If you misunderstand a question, politely ask for repetition or clarification. Interview, talk and discussion are assessed together.

ESL-0032

RESPUESTA

No. The one-minute preparation is for reading the card and preparing mentally, without written notes.
